DECK MOISTURE CONTENT REPORT

FILE # 04097

SURVEY DATE: 8/18/04

REPORT DATE: 8/22/04

MANUFACTURER: Donzi Marine, Sarasota, Florida

MODEL: Daytona 33ZX

YEAR: 2003

HIN: DNAZ8001E203

CONTRACTOR: RV Wagner SA
Forecast Marine Consulting and Surveying

ADDRESS: 10730 Old Grove Circle

CITY, ST. ZIP: Bradenton FL 34212

PHONE: (941) 748-6847

SCOPE OF SURVEY: This moisture content inspection was performed on the bow of the subject vessel only. The areas of particular concern were around the deck hatches and the bow light. Conditions at time of the survey were: temperature in the high 70s, sunny and light wind. There was no residual moisture from morning dew on the deck or hull. Moisture readings were taken with the GRP 33 meter.

FINDINGS: Prior to the inspection the meter was calibrated and found to be calibrated correctly. The areas of interest were inspected during the process of taking readings over the entire foredeck. The readings in the areas of interest were consistent with readings taken in other areas.

Readings varied little. All indicated moisture content of 0.50% or less. There were no spikes around either deck hatch or the bow light. Other areas which typically have elevated readings i.e., the hand rail mounts, also had readings of 0.50% or less.
